

CHRISTOPHER SANNAR

ABOUT ME

Hi there, I'm a Full-Stack Software Engineer who specializes in Networking Applications and Education. I like building robust systems and enjoy working with other people. I'm hoping to start my own business someday providing educational tools for students interested in the world of Computer Science.

EXPERIENCE

CompTIA/Testout, Remote – Full-Stack Software Engineer

MAR 2021 – JAN 2025

- Simulated real world applications like Windows, Linux, and computer networks. Designed Complicated Software to be robust yet flexible; most of the code was designed to mimic real systems to a degree.
- Javascript/Typescript, React.js, Node.js, npm, yarn, XAML/Silverlight, Networking Design, Operating System Design, Cyber Security, Software Design Principles/Patterns, Jira, Bit-bucket pipelines (yaml), Copilot/AI, Git, Agile, etc.

2U, Remote – Teaching Assistant/Tutor

MAR 2020 – MAY 2021

- Teaching/Tutoring the fundamentals of Full-Stack Web Development, Coding, Debugging, and Networking Principles.
- Javascript, React, Node.js, Express.js, MongoDB, MySQL, Git, Networking Principles (HTTP, Server Architecture), etc.

UVU, Orem UT – Tutor

JAN 2019 – MAY 2019

- Teaching/Tutoring the fundamentals of Computer Science and Software Engineering. Worked to explain coding principles in a wide variety of Languages.
- C#.NET, C++, Java, Python, Javascript, Software Design, Networking, Computer Architecture.

Elite Roofing, Remote – Jr. Full-Stack Developer

AUG 2017 – NOV 2018

- Creating a Full-Stack Application. Coordinating with other developers to build a web app to estimate construction work orders.
- MEAN Stack – Angular 6, Node.js, Express.js, MongoDB, Git, Heroku, Agile, Jira, UI/UX.

EDUCATION

UVU, Orem UT – *Computer Science: Networking Emphasis*

JAN 2008 – MAY 2019, Orem UT

Intermediate to advanced computer science concepts, including algorithms, data structures, and software development, with a strong focus on networking principles, protocols, and implementation.

PROJECTS

Voyagers of the Dust – *Mobile App Game*

React Native, Typescript, JVM, Android

A Fun Space Adventure Game with complex reusable interfaces. Also a Game Engine for creating dynamic, AI-generated interfaces.

<https://github.com/ChrisSannar/VoyagersOfTheDust>

Code Explainer – *Coding Education Platform*

Node.js, Express.js, MongoDB, React.js

A Learning tool for beginning developers to quickly understand code syntax and functionality

<https://github.com/ChrisSannar/code-explainer>

Code Cardio – *Coding Education Platform*

Typescript, Node.js, Express.js, Passport, JWT, GraphQL/Apollo, Docker, PostgreSQL, TypeORM, and deployed on GCP.

A flash card like application to help beginner developers practice coding daily. Focuses primarily on syntax instead of programming.

(Currently Unavailable)

AWARDS

NSF LEAP Academic Scholarship (AUG 2018 - JUN 2019)

SSI Scuba Instructor (APR 2024)
